

How many high-risk drivers are on the road right now,
driving your company's vehicles?

CCM's FleetGuard has the answer.

FleetGuard™

Whether you have 10 drivers or 10,000, CCM's FleetGuard™ keeps you completely informed.

Identify your company's high-risk drivers with a few keystrokes, and take appropriate action on a case-by-case basis.

CCM's FleetGuard lets you customize a point system and risk level to match your company's unique needs.

Designed to fit your organization like a glove.

With FleetGuard, you can create your own set of safety parameters based on what your drivers experience in the field. Even state-to-state differences aren't a problem. Point values are equalized, so the results are accurate no matter where your drivers are located.

Enjoy a fully automated MVR process.

FleetGuard provides a solution to one of the fleet industry's biggest challenges — out-of-date motor vehicle records. It enables you to access the latest driver information instantly. And, since FleetGuard allows for MVR release forms to be signed digitally, the process is even more efficient.

FleetGuard helps identify high-risk drivers, so you can intervene with the appropriate action.

Imagine a powerful database that enables you to monitor the whole range of safe driving issues, right from your desktop. Supported by GPS technology, Telematics, and How's My Driving reporting, FleetGuard helps ensure that your company remains an unlikely target for a negligent entrustment lawsuit.

Make driver safety your top priority.

Safe driving and your company's good reputation are too important to leave to chance. CCM's FleetGuard documents all the steps you take to promote safe driving. To learn more, or to arrange a complimentary demonstration, call Bob Martines at 215-396-1992.

Run automated MVRs, pull management reports, view stored documents and much more.

Motor Vehicle Report

Original Order Information:

Company Name: COM Demo Company	Requestor: J. Smith	Order Date: 03/11/2010
Driver Name: Norris, William	License: 19536879	Date of Birth: 02/17/1979
State/Province: PA	Gender: Male	

State Driver Information:

Driver Name: Norris, William	License: 19536879	Date of Birth: 02/17/1979	Address:
------------------------------	-------------------	---------------------------	----------

Physical Characteristics:

Gender: N/A	Eyes: N/A	Hair: N/A	Weight: N/A	Height: N/A	Age: 49
-------------	-----------	-----------	-------------	-------------	---------

Accidents:

Accident Date	Location	State	Accident Description	Injury	Fatality	Business	Docket #	Code	Points
*** No Accidents Reported ***									

Violations/FTAs:

Viol. Date	Conv. Date	Location	State	Violation Description	Accident	Susp.	Code	Points
07/15/2007	07/26/2007	Henderson Co	TX	Possession of Open Container			CB12	

Starred items (*) are not included in the Total Points as their time frame falls outside of the client defined violation cutoff of 36 months from the Print Date. Dashed items (†) are not assigned Safety Points as their time frame falls outside of the client defined violation cutoff of 36 months from the Return Date.

Suspensions/Revocations:

Incident Date	Reinstatement Date	Susp.	State	Action	Action Description	Docket #	Code
*** No Suspensions or Revocations Reported ***							

License Types/Restrictions/Endorsements:

Type	Code	Class Description	Issue Date	Expire Date	Status
Personal	C	Single Van < 26K		10/11/2009	

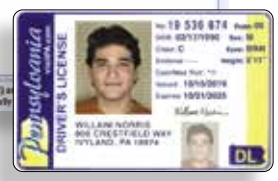

State Messages:

*** No Messages Reported ***

Reference: 75007
Return Date: 06/11/2010
Print Date: 12/08/2009
Clear: No
Risk Points: Level 3 / 10.0

Build a complete file of relevant documents and forms for each individual driver.

Retrieve stored documents and licenses with ease.

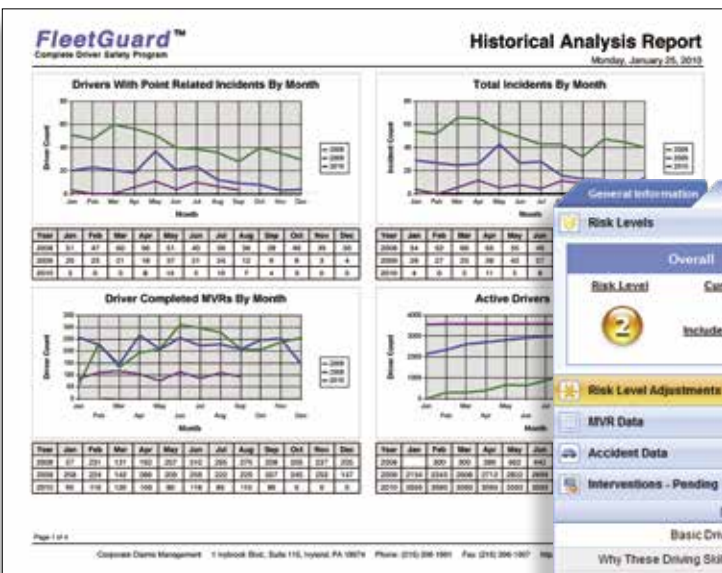

All MVR reports are in the same format – regardless of the state where they originate.

With the lower costs of telematics and tracking hardware, even smaller fleets can take advantage of fleet tracking.

Pull reports & monitor training

Use GPS & Telematics

Easily maintain a complete record of incidents, MVRs, active drivers and much more.

Overall		MVR		Accident

Why These Driving Skills Are Important to Your Job (PSD)	VIOL	-	-	Not Authorized
Parking Lot Collisions (TOC)	VIOL	-	-	Not Authorized
NASC Online Training	-	-	-	Not Authorized

Schedule and monitor safe-driving education.

Here's why you need CCM's exclusive FleetGuard driver safety system.

The highways are full of danger. Safety and Risk Managers have plenty of reasons to be concerned.

The issues are all too familiar: aggressive driving, cell phone abuse, drug and alcohol impairment and driver fatigue. By putting so many drivers on the road each day, a serious accident becomes virtually *inevitable*.

With FleetGuard in place, you can rest assured, knowing you've taken every reasonable precaution.

By making it easy to identify your company's high-risk drivers, FleetGuard helps you take appropriate action before their dangerous behavior leads to a serious accident. And FleetGuard documents everything.

Consider all these advantages:

- Point leveling (e.g., a speeding ticket in CA has the same value as one in NY)
- Configurable point and risk level system
- Automation ensures consistent, no-bias accuracy
- Easy-to-use interface
- Quick identification of high-risk drivers
- Standardized MVR reports from state to state
- Easy MVR ordering with results returned within 1 minute for most states (including bulk MVR orders)
- Validation rules reduce MVR ordering errors
- Detailed data searches that can be exported to Excel (ad-hoc reporting)
- Historical year-over-year trending (demonstrates the effectiveness of your safety program), plus other PDF reports
- Reduces the tedious process of collecting and managing driver release forms, thanks to an online electronic signature process
- Automated email notifications (it's not necessary to log in every day – you will be notified when an issue arises, e.g., a change in a driver's rating)
- Fully integrated training recommendations and monitoring for completion
- Secured information per state requirements
- Client security can be set up so managers can only view drivers for whom they are responsible
- Third-party accident data integration
- Makes it easy to manage complex relationships (driver to spouse, driver to manager, contractor to sub-contractor, etc.)

Our complete Fleet Management program includes:

- Accident management
- Driver Safety
- Vehicle remarketing
- Telematics
- Vehicle maintenance
- Subrogation
- Vehicle transport
- GPS technology
